CAREER OBJECTIVE

Motivated MCA student with a strong foundation in software development, Python, Java, SQL, web technologies, and artificial intelligence. Seeking an entry-level Software Developer or AI-related position where I can apply my technical knowledge, contribute to innovative projects, solve real-world problems, and continuously enhance my skills in emerging technologies.

EDUCATION

Master of Computer Applications (MCA) VVIT University, Nambur <i>Score: Pursuing</i>	2025 – 2027
Bachelor of Computer Applications (BCA) Vignan Degree & PG College, Guntur <i>Score: 9.0 CGPA</i>	2022 – 2025
Intermediate (MPC) Sri Chaitanya Junior College, Guntur <i>Score: 9.35 CGPA</i>	2020 – 2022
Secondary School Certificate (SSC) Oxford Concept School, Guntur <i>Score: 10 CGPA</i>	2019 – 2020

TECHNICAL SKILLS

Programming Languages: Python, Java, C

AI & Prompt Engineering: Prompt Design, Optimization, LLM Concepts, AI Assistant Workflows

Web Technologies: HTML5, CSS3, JavaScript

Databases: MySQL

Developer Tools & Version Control: Git, GitHub

Core Computer Science: Data Structures (Arrays, Linked Lists, Stacks, Queues, Trees), OOPs

INTERNSHIP

AI & Prompt Engineering Intern VaultofCodes | Recent

- Completed a specialized internship in AI & Prompt Engineering, building practical experience in prompt design, optimization, and structuring for Large Language Models (LLMs).
- Designed and tested structured, task-specific prompts to improve output accuracy, context retention, and system reliability across varied domain requirements.
- Engineered and evaluated concepts for AI Assistants, enabling factual question answering, text summarization, creative generation, and actionable user advice.
- Applied prompt refinement methodologies to enhance AI response consistency, formatting, and relevance for automated workflows.

PROJECTS

AI Assistant Workflow & Prompt Engineering Suite

- Formulated multi-turn prompt structures tailored for concise text summarization, knowledge extraction, and conversational AI guidance.
- Optimized prompt constraints and context windows to maximize response precision while minimizing hallucination and off-target output.

Responsive Recipe Website ("Delicious Delicacies")

- Architected an intuitive, interactive recipe discovery web application featuring responsive design across devices using HTML, CSS, and JavaScript.
- Implemented real-time recipe search and filtering functionality, improving user navigation and site engagement.

Snake Game in Python

- Developed a classic desktop Snake game utilizing Python, keyboard event listeners, and real-time collision detection logic.
- Integrated dynamic scoring mechanisms, high-score tracking, and game-loop state management using modular Python programming.

CERTIFICATIONS

- **Artificial Intelligence Fundamentals** — IBM
- **Data Science with Python** — United Students Latino Association
- **Customer Engagement: Problem Solving and Process Controls** — IBM SkillsBuild
- **Customer Engagement: Communication and Personality Dynamics** — IBM SkillsBuild
